

PROSPECT RESEARCH ASSIGNMENT: Time sensitive need for prospect research into 20 individual donors in the Twin Cities area under consideration for a comprehensive campaign request. Most have been previously involved at some level in philanthropy for this international cause. They are largely Minnesota-based individuals, although some may have residences elsewhere in the US.

The need is to learn all information available regarding their level of wealth and estate size, as well as level of philanthropic giving. We are also interested to understand the organizations in which they are involved, particularly those with any international component, and their engagement in community organizations where they live.

Finally, there is a desire for information regarding their education, and a summary of their family. Any information regarding their current or past professional career roles will be valuable to this effort as well.
